

## Editor's Notes

¶STEPHEN HEATHORN is Associate Professor of History at McMaster University and the author of *For Home, Country and Race* (Toronto, 2000) and academic articles on the politics of memory and national identity in modern Britain. He is co-editing (with William Bruneau) Volume 18 of the *Collected Papers*. BERNARD LINSKY is Professor of Philosophy at the University of Alberta. He is writing a monograph on the second edition of *Principia Mathematica*. YOUR EDITOR is editing *Papers* 24 and 25 and remains on the lookout for new letters and manuscripts for the Archives. ROMA HUTCHINSON is a graduate in philosophy and art history and an accredited member of the Society of Indexers. GREGORY LANDINI, Professor of Philosophy at the University of Iowa, has a book forthcoming from Cambridge in 2006 titled *Wittgenstein's Apprenticeship with Russell*. He is hosting the annual meeting of the Bertrand Russell Society on 27–8 May 2006 in Iowa City. CHRISTOPHER PINCOCK is Assistant Professor in Philosophy at Purdue University. His essay “Carnap, Russell and the External World” will appear in *The Cambridge Companion to Carnap*. His research project in Russell studies is to better understand how Russell changed his philosophical views in response to scientific developments. SCOTT SOAMES is Professor of Philosophy at the University of Southern California. He has recently published *Reference and Description* (Princeton, 2005) and is preparing a revised edition of *Philosophical Analysis in the Twentieth Century*. MICHAEL D. STEVENSON is a researcher with the Bertrand Russell Research Centre and co-editor of the forthcoming *Papers* 21. He is the author of *Canada's Greatest Wartime Muddle* (McGill-Queen's, 2001). WILLIAM BRUNEAU taught in the University of British Columbia's Educational Studies department until 2003 and now devotes himself to writing, editing and association work. He is co-editing (with Stephen Heathorn) *Papers* 18. DOMINIQUE DÉRY is an undergraduate at McMaster majoring in philosophy and religious studies.

The centenary in 2005 of the publication of “On Denoting” was marked by several conferences. Now collections of the papers are being published. McMaster's conference organizers Nicholas Griffin and Dale Jacquette have active plans for publication. The journals *Világosság*, *Teorema*, *Mind* and *Russell* are devoting issues to denoting, and those of the former two have already appeared. So has Imaguire and Linsky's volume. A substantial booklet of extended abstracts

from the Bologna–Padua conference, in lieu of plans for immediate publication, is at <http://www.filosofia.lettere.unipd.it/analitica>.

¶Forthcoming publications include another from the *Collected*  
**Forthcoming** *Papers* series. Volume 21, covering Russell's non-technical writings  
**Books** of 1935–38 and edited by Andrew Bone and Michael D. Stevenson, is very close to completion.

¶New books include Michael K. Potter's *Bertrand Russell's Ethics*  
**New** (Thoemmes Continuum, 2006) and Guido Imaguire and Bernard  
**Books** Linsky's *"On Denoting", 1905–2005* (Philosophia, 2005). A list of new and recent books in Russell Studies since 1994 is maintained at <http://www.mcmaster.ca/rusdocs/forthnew.htm>.

¶New acquisitions in the Russell Archives include copies of at  
**New** least a dozen letters written to Leonard K. Elmhirst, a Cambridge  
**Acquisitions** contemporary of Russell who with his wife owned Dartington Hall school. There is also a letter from Elmhirst in old age describing and evaluating Russell's personality.

¶Two new lectures by Russell have come to light. Richard  
**New** Schmitt searched the digitized *Chicago Tribune* and discovered  
**Lectures** that Russell was to speak in 1942 to the Nineteenth Century Women's Club. He then found a lengthy report of the lecture in the local Oak Park *Oak Leaves*. The talk has the intriguing new topic, "Democracy and Individual Development". Nick Griffin found in Saunders Mac Lane's *A Mathematical Autobiography* (2005) an account of a lecture at Harvard's Mathematical Colloquium in 1938: "Russell proceeded to give an enthusiastic lecture, which, roughly speaking, described the state of mathematical logic as it was in 1920." His failure to answer Mac Lane's query on Hilbert and Gödel was disappointing. Russell had been his hero as a Yale undergrad. He took to *Principia's* idea of a formal proof, but couldn't get even a reading course on *PM*.

¶News of the Russell Research Centre will be found in its annual  
**BRRC** *Newsletter*. The fourth issue is being sent to *Russell* subscribers. Write to its editor, Sheila Turcon, to request a copy. It has an article on the Russell documentary film being produced by Redcanoe.

¶Some 5,400 draft entries for the electronic catalogue of Russell's  
**BRACERS** correspondence were added in the past ten months. The public website at <http://130.113.103.66:591/bracers/> has been updated. BRACERS is the cornerstone for bibliographic control of the Russell Archives and of the *Collected Letters* and *Papers* projects.

¶Russell-I is a discussion forum managed by Andrew Bone for  
**"Russell-I" &** the benefit of Russell Studies. Visit <http://mailman.mcmaster.ca/mailman/listinfo/russell-l>. All the messages since 1993 are  
**the Internet** archived and available to members of the forum.
