**Editor's Notes**

**Contributors**

Andrew G. Bone is Senior Research Associate at the Russell Research Centre. He obtained a PhD in modern British history from McMaster. He edited *Collected Papers* 28 and 29 and coedited 21, and is currently moving towards completion of Volume 26, which covers part of the early Cold War. Charles Argon is an undergraduate in the East Asian Studies department at Princeton, with research interests in China–West interactions and modern Chinese history. He plans to pursue graduate work in Chinese history. Albert C. Lewis is an historian of mathematics who is one of the founders of the Archives of American Mathematics. He was a Research Associate on the Russell Editorial Project for many years whose name appears on four title-pages of the *Collected Papers* and who made lasting contributions to the computer technology of producing the volumes. He is a trustee of the Educational Advancement Foundation in Austin, Texas. G. E. Moore’s unpublished review has been in the Russell Archives since 1971, when his widow, Dorothy Moore, allowed a copy to be deposited. Your editor, using BRACERS, has published “Russell’s Illnesses and Injuries” in the Bertrand Russell Society *Bulletin*, fall 2015 (his stoical bearing of frequent ill health in very old age deserved documentation) and continues to edit *Papers* 24 and 25 when not proofing BRACERS. Adrienne Wolfe is a fourth-year philosophy and classics student at McMaster in her third year with *rrrc*. She has made thousands of careful BRACERS entries.

Thomas Baldwin, who recently edited Moore’s *Early Philosophical Writings* with Consuelo Preti (see the review in *Russell*, winter 2013–14) plans to publish the complete (and very long) review of *The Principles of Mathematics* in another collection of Moore’s writings. Moore had published a review of British philosophical works of 1902 in the 1904 volume of *Archiv für systematische Philosophie*. This review seems intended to cover British works of 1903, but *PoM* may have been the only one.

Tim Madigan and Peter Stone, eds., *Bertrand Russell, the Public Intellectual* (Rochester: Tiger Bark Press).

Obtained were copies of Harry T. Costello’s notes on Russell’s 1914 course at Harvard, “Advanced Logic”, thanks to Bernard Linsky. Michael Stevenson has donated a photo of a 1941 letter to Russell’s UCLA contact, Earle Raymond Hendrick. From Beijing in 1920 Russell sent Lady Ottoline Morrell snapshots of his surroundings. They are referred to in SLBR 2: #342 and were presumably taken by Dora Black; he wrote the hitherto unseen captions. Good scans from the Harry Ransom Center at the University of Texas have replaced the very poor microfilm images of the photos. The tape recordings sent by Christopher Farley in 2012 have been digitized. They include his last BBC interview, broadcast on “Women’s Hour” when he published Volume 1 of his Autobiography. Tony Simpson of the BRF has confirmed that many old tape recordings were transferred to vinyl. This was at the end of Russell’s life, to judge from correspondence. They include the long-lost audio of “Reading History as It Is Never Written”. The transcription in the Collected Stories can now be checked.

We had to replace Sidney Hook’s Out of Step; an Unquiet Life in the 20th Century (1987). It came with the dust-jacket. Only on the dust-jacket there is a photo of Hook and Russell at the 1948 International Congress of Philosophy in Amsterdam. Russell looks perfectly outraged at what he is hearing.

Except for the latest complete volumes (34–35), Russell may be consulted freely on the Internet at McMaster’s new site, http://escarpmentpress.org/russelljournal/. For online and print subscriptions, see this site or the rear cover.

The Russell Archives’ annotated catalogue of letters totalled 130,937 records by 6 November 2015. That’s a growth of 1,727 since last issue (and 6,699 in the complete year since migration); in the recent period, tens of thousands of entries were revised and B&R references and some images inserted. Among overall improvements, records are web pages, references to other records hyperlinked, accuracy in foreign names and alphabets achievable with accents, and recipient and sender names made consistent. The correction and completion of case conversion, italicization and linking (by BRRC’s Arlene Duncan) from the mainframe’s plain all caps has reached 65% and my revision 60%. Sheila Turcon is editing names for consistency. Bridget Whittle enters recent acquisitions and markers found in Russell’s library. Coverage of the holdings of Russell’s letters is very nearly complete, thanks to BRRC and Library staff, but we have still to include letters from printed sources. The eminently searchable database is capable of much more than correspondence.
